WORK EXPERIENCE - SOFTWARE DEVELOPMENT RELATED

Abstract, Remote (Italy): Full Stack Web Developer

March 2022 - Current

As a **Fullstack Developer** specializing in the **MERN stack** (MongoDB, Express.js, React.js, Node.js), I contribute to the development of a robust web application with a focus on both front-end and back-end functionalities. Utilizing my expertise in Typescript, I collaborate with cross-functional teams to design and implement scalable solutions that meet project requirements and exceed client expectations.

My responsibilities include:

- Developing **RESTful APIs** and building interactive user interfaces.
- Integrating third-party services and optimizing application performance.
- Managing the end-to-end deployment process for different application versions into **Production and QA environments**.
- Serving as the primary point of contact for developer-side **Application Management Services (AMS)**.

Through agile methodologies, continuous integration, and test-driven development, I ensure the delivery of high-quality code. I actively participate in code reviews and stay updated with the latest trends and technologies in web development. My dedication to innovation, problem-solving, and teamwork enables successful project outcomes.

Scandiweb, Remote (Latvia): Front-end Web Developer

January 2022 - March 2022

Assisted in the development and testing of software products, gaining practical experience in software development lifecycle. Collaborated with senior developers to troubleshoot and resolve software issues, enhancing problem-solving skills. Participated in team meetings and contributed ideas to improve software development processes.

Independent, Remote: Full Stack Web Developer

January 2020 - January 2022

Through the years I have developed web app solution for small businesses using different technologies depending on the client needs. Such as Java (Spring Boot), ReactJS, NextJS, NodeJS, MongoDB, PostgreSQL
